

AXIO TANK BAG

What It Is: The coolest tank bag we've seen in a long time, Axio's version is constructed of a hard but lightweight polycarbonate exterior and features a handy storage tray (wallet or cell-phone size) under a rainproof PVC map pocket. A nylon base makes the bag expandable, ingenious interior design will keep you organized, and built-in shoulder straps allow you to fold away the magnetic flaps and use the whole thing as a backpack.

Your Choices: Gloss red, electric blue, metallic silver, or carbon finish.

GAERNE G-RS05 BOOT

Construction: With the aim of taking performance and comfort to the next level, Gaerne has designed a new rear-entry system and added an upper-pivot protection system and "gel ankle." Other features include a rubber grip guard, aluminum buckles, titanium toe sliders and rear heel caps, and an anti-vibration sole.

Available In: Carbon white, carbon gray, and black, in sizes 6-13.

TWO BROTHERS M2 EXHAUST SYSTEMS

What They Are: Three slip-on exhaust systems designed specifically for the 2006 Yamaha R6, all of which utilize the company's unique V.A.L.E. process of attaching the muffler canisters to the exhaust tube without the use of springs or welding, allowing "infinite adjustability and precision fit."

Constructed Of: Mandrel-bent thin-wall stainless steel slip tubes, with mufflers available in polished aluminum, filament-wound carbon fiber, and titanium.
